

A New Manuscript of the *Padārthadharmasaṅgraha* Preserved in Kashmir University

Norihiko TANAKA

A good number of Sanskrit manuscripts of the *Padārthadharmasaṅgraha* (=PDS) or the *Praśastapādabhāṣya* have been discovered in the Indian cultural area. They have facilitated the critical studies of this important work of Vaiśeṣika philosophy. But unfortunately, although we have various editions of PDS, one can not say the task of collating MSs have been done satisfactorily. It is due to the fact that almost all MSs of PDS are either incomplete or quite indistinct.

A research group in Kashmir Buddhism of our university brought photo-copies of many manuscripts from Kashmir. We could find out the MS of *Padārthapraveśa* which is another name of PDS among them. It suffers a loss only 6 lines at the beginning.

Through our comparative study of this our MS with various editions, we became aware that no edition has so far dealt with this MS. In the edition of Kṛṣṇaśāstri¹⁾, he mentions that he has dealt with MS from Kashmir. But it is without doubt not the same as our MS.

In spite of that most of all MSs which we have investigated are incomplete, our MS is almost complete. It is due to these circumstances that it has taken all this time for this text to be published.

The present work is a romanized transliteration of the manuscript preserved in Kashmir University. Details of MS is as follows ;

No of MS : 2269 B-6 B-4.

Material : Birch-bark.

Script : Śāradā.

Size : 24×16 (cm).

Folios : 40.

Lines : 10–21, mainly 15, 16, 17 lines.

Extent : Incomplete, only 6 lines of the beginning are lost.

Style : Binding left hand side.

Remark : the 40th folio is broken, and is preserved separately into two.

1) Vaiśeṣikadarśanam of Śrī Kaṇāda Muni, with Praśastapādabhāṣya of Praśastapādācārya, Ed. by Śrī Kṛṣṇaśāstri, Sanskrit Book Dep. Lahore 1922.

List of marks

- [] Not clear.
... Broken but letter fragments are visible. Each partial aksara is represented by two dots.
= Ligature
* Virāma
— Open space.
— Open space indicated in the MS itself.
Marginal supplement.
/// Beginning and end of fragmental line.
